

## OpenCart manual installation

Unfortunately the OpenCart plugin can't be installed completely via the back end of your webshop. Instead, you will need to use an FTP tool to upload the files manually.

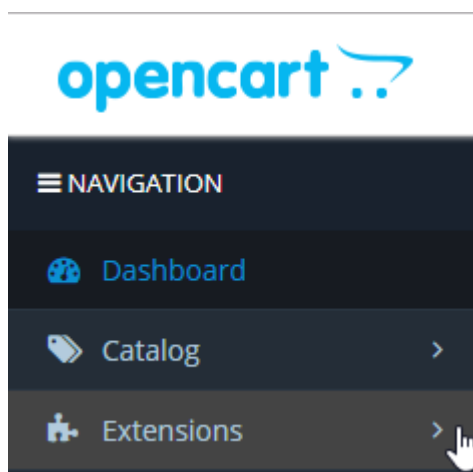

1. Go to your OpenCart installation with an FTP tool.
2. The content of the directory will look as following:

Bestandsnaam	Grootte	Gewijzigd
config.php	1.5 KB	Vandaag 18:42
admin	--	Vandaag 18:40
system	--	Vandaag 18:16
image	--	Vandaag 18:16
php.ini	451 B	Vandaag 18:16
index.php	311 B	Vandaag 18:16
catalog	--	Vandaag 18:16

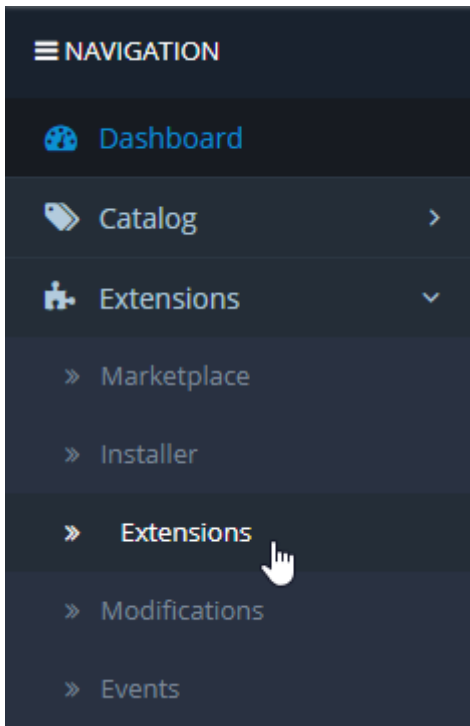

3. Upload the following folders from the ZIP file to the root directory of your OpenCart 2.3.X installation.

Naam	Bewerkingsdatum	Grootte	Soort
admin	6 aug. 2019 20:44	--	Map
catalog	6 aug. 2019 20:44	--	Map
system	6 aug. 2019 20:44	--	Map

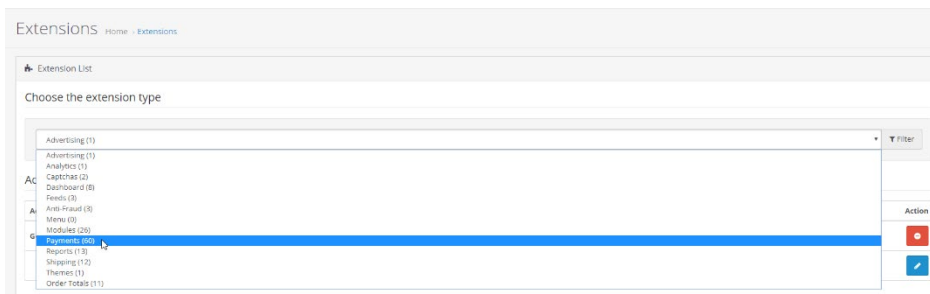

4. Go to the back end of your webshop.
5. In the menu, click on the sign next to 'Extensions'.

6. Click on 'Extensions'.

7. In the drop down menu click on 'Payments'.

8. Look for the EMS Online modules. Click on the green + sign for the payment method you want to activate.

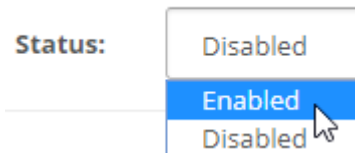

EMS Online: AfterPay		Disabled	 
EMS Online: Bancontact		Disabled	 
EMS Online: Credit Card		Disabled	  
EMS Online: IDEAL		Disabled	  
EMS Online: Klarna		Disabled	 
EMS Online: Paycomiq		Disabled	 
EMS Online: PayPal		Disabled	 
EMS Online: Bank Transfer		Disabled	 
EMS Online: SOFORT		Disabled	 

9. Opencart will install the module. Now click on the 'Edit' button.

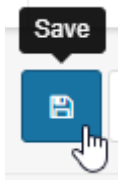

10. Fill in the API key you received in the field 'EMS Online API Key'.

11. Change the 'Status' to 'Enabled'.

12. You will need to select which pages will be used for all the different order statuses. This is dependent on the setup of your webshop. Save in top right corner.

13. Repeat steps 10 till 14 for every payment method you'd like to activate for your webshop.

14. You're done, the active payment methods should be visible in the checkout of your webshop.
