

Zen Cart manual installation

Unfortunately the Zen Cart plugin can't be installed completely via the back end of your webshop. Instead, you will need to use an FTP tool to upload the files manually.

1. Go to your Zen Cart installation with an FTP tool.
2. Upload the files from the ZIP file to the root directory of your Zen Cart installation.
3. Go to the back end of your webshop.
4. In the menu, hover over 'Modules' and then click on 'Payment'.

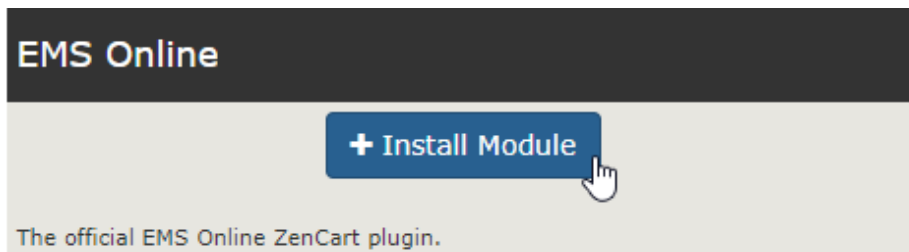

5. Click on 'EMS Online' in the Payment Modules list.

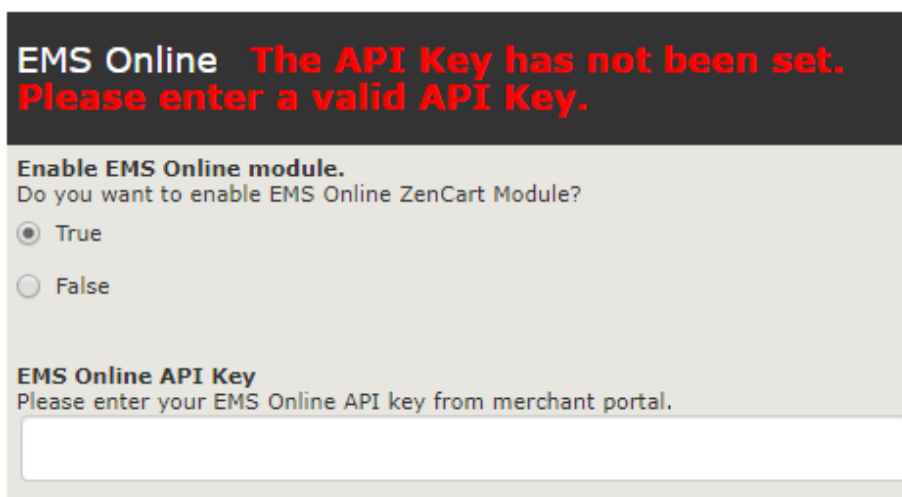

PAYMENT MODULES

Modules	Sort Order	Orders Status	Action
Authorize.net (SIM) (Not Configured)	authorize.net	0 ● Pending	▶
Authorize.net (AIM)	authorize.net_aim	●	⌵
Cash on Delivery	cod	●	⌵
EMS Online	emspay	●	⌵

6. On the right side the following will pop up, click 'Install Module'.

7. A new screen will show on the right side.

-
8. Fill in the API key you received in the field 'EMS Online API Key'.
 9. You will need to select which pages will be used for all the different order statuses.
This is dependent on the setup of your webshop. Leave the rest as is.
 10. Scroll down and click 'Update'.
 11. Repeat step 6 for every payment method that starts with 'emspay_' that you'd like to activate for your webshop.
 12. You're done, the active payment methods should be visible in the checkout of your webshop.
